Section 5: Firefighting measures

5.1 Extinguishing media

Extinguishing media	Use fire-extinguishing media appropriate for surrounding materials. Use water fog, foam, dry chemical or carbon dioxide (CO2) to extinguish flames.		
Unsuitable extinguishing media	High volume water jet.		
5.2 Special hazards arising from the su	bstance or mixture		
Hazardous combustion products	During fire, gases hazardous to health may be formed.		
Unusual fire & explosion hazards	No unusual fire or explosion hazards noted.		
Specific hazards	If heated, harmful vapours may be formed.		
5.3 Advice for firefighters			
Special fire fighting procedures	Avoid breathing fire vapours. Keep up-wind to avoid fumes. Fight advanced or massive fires		
	from safe distance or protected location. Do not scatter spilled material with more water		
	than needed to fight the fire Do not get water inside container		
Protective equipment for firefighter	rs Fire-fighters should wear appropriate protective equipment and self-contained breathing		
	apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-		
	fighters (including helmets, protective boots and gloves) conforming to European standard		

EN 469 will provide a basic level of protection for chemical incidents.

Section 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel For emergency responders	Wear protective clothing as described in Section 8 of this safety data sheet. Do not smoke, use open fire or other sources of ignition. Make safe all sources of ignition. Avoid contact with skin and eyes. Follow safe handling advice and personal protective equipment recommendations for norm use of product.	
6.2 Environmental precautions		
Environmental precautions	Do not discharge into drains, water courses or onto the ground. Spillages or uncontrolled discharges into watercourses must be IMMEDIATELY alerted to the Environmental Agency or other appropriate regulatory body.	
6.3 Methods and material for containme	ent and cleaning up	
Spill clean up methods	Stop leak if possible without risk. Wear necessary protective equipment. Absorb spillage with non-combustible, absorbent material. Ensure that waste and contaminated materials are collected and removed from the work area as soon as possible in a suitably labelled container. Wash thoroughly after dealing with a spillage.	
6.4 Reference to other sections		
Reference to other sections	For waste disposal, see section 13. See section 1 for emergency contact. For personal protection, see section 8 $$	

Section 7: Handling and storage

Handling	,	Read and follow manufacturer's recommendations. Do not handle broken packages without protective equipment. Avoid spilling, skin and eye contact. Do not use contact lenses. Keep away from heat, sparks and open flame. Eliminate all sources of ignition. Observe occupational exposure limits and minimise the risk of inhalation of vapours and mist. Ensure adequate ventilation. Vapours are heavier than air and may spread along floors. Do not eat, drink or smoke when using the product.
<u>7.2 Conditions fo</u> Storage pred	or safe storage, including cautions	Store in tightly closed original container in a dry, cool and well-ventilated place. Keep upright. Keep locked up and out of reach of children. Avoid storing for very long periods. Keep container tightly sealed when not in use. Bags or containers, which are opened, must be carefully resealed to prevent leakage. Avoid contact with oxidising agents. Store away
Storage clas	55	from acids. Store separate from alkalis. Store in cool dry areas away from direct sunlight or sources of ignition. Store away form other chemicals. No information available.

Other protection

Provide adequate ventilation, including appropriate local extraction, to ensure that the defined occupational exposure limit is not exceeded.

Not normally required if good ventilation is maintained. Use type ABEK (EN 14387) respirator cartridges as a backup to engineering controls. Use respirators and components tested and approved under appropriate government standards such as CEN (EU). Type A/organic vapour protective components recommended. Consult manufacturer for specific advice.

Use suitable protective gloves if there is a risk of skin contact. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Change gloves regularly. Suggested material: Nitrile rubber gloves. Minimum layer thickness: 0.7mm. Minimum breakthrough time / gloves: 480 min. Wear safety goggles or face shield to prevent any possibility of eye contact. Use equipment for eye protection tested and approved under appropriate government standards such as EN 166(EU).

Protective clothing should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. The selected clothing must satisfy the European norm standard EN 943.

Hygiene measures	DO NOT SMOKE IN WORK AREA! Wash hands at the end of each work shift and before eating, smoking and using the toilet. Wash promptly if skin becomes wet or contaminated. Promptly remove any clothing that becomes contaminated. When using do not eat, drink or smoke.
Process conditions	Keep container tightly sealed when not in use. Ensure that eye flushing systems are located close by in the work place.
