

#### PRODUCT DESCRIPTION & USE

**Fleetwood Anti-Slip additive** is a mixture of glass microspheres and polypropylene wax specifically designed to provide a skid resistant coating when added to Fleetwood Floorpaint. The additive adds a slight surface texture to the finished coating, imparting, and promoting skid resistance. The additive does not affect the colour or performance properties of the coating but will decrease the gloss level due to the textured nature of the finish.

#### KEY BENEFITS

- Provides an anti-slip surface
- Tough and durable

#### AVAILABLE IN SIZES

#### VOC CONTENT

N/A

#### COMPOSITION (NOMINAL)

**Pigment:** glass microspheres & polypropylene wax.  
**Binder:** None  
**Solvent:** None.

#### SOLIDS - SPECIFIC GRAVITY

**Specific Gravity** 1.45 g/l (+/- 0.2)  
**Volume Solids** 100 %

#### APPEARANCE

Greyish white fine powder

#### MIXING INSTRUCTIONS

Add one full container (350g) to a 5 litre can of floor-paint. Mix thoroughly into the paint until a uniform and consistent mixture is achieved. The additive has been designed to stay in solution so the paint can be used for up to 4 hours after addition without repeated mixing.

#### PRECAUTIONS

Keep out of reach of children. Ensure good ventilation during addition to the paint, when mixing and during application. If the product comes in contact with the eyes rinse immediately with plenty of water. To remove splashes from skin use soap and water or a recognised skin cleaner. Do not take internally

#### APPLICATION

Follow application directions for Fleetwood Floorpaint. Application of a coating containing the Fleetwood Anti-slip Additive by airless spray is not recommended.

#### PREVIOUSLY PAINTED SURFACES

All surfaces to be painted should be clean, dry and free from loose and flaking material. Glossy surfaces must be rubbed down to provide a key. Stir well before use. Avoid overspreading. For best results use a good quality synthetic brush. If using a roller lay off to avoid pin-holing
